

Hallie Weintraub | Full-stack developer | Lead quality assurance engineer

Lead quality assurance engineer of the Android team at TASC. In addition to Android quality assurance, my role includes QA of responsive web application and IOS, as well as supporting Business Analysts, Developers, UX designers and product owners. We operate in agile scrum teams, working in two-week sprints. I am also a qualified full stack developer. My knowledge of development languages, Bachelor of Science degree and attention to detail that comes with a quality assurance background, ensures a focus on delivering a high standard of digital product.

Employment History**Total Administrative Services Corporation (TASC)**

Quality assurance engineer, Android | 2019 – Present | Madison, WI

TASC is an award-winning nationwide administrator of tax-advantaged health benefits plans offering comprehensive services for Clients, Participants, and Providers. Clients of TASC include the federal government, and Mastercard and others.

Key Responsibilities

- Serve as lead QA on the Android platform, owning all testing functionality and platform subject matter expert
- Create test cases based on acceptance criteria as well as other scenarios to ensure quality of new and current features
- Develop users and accounts that match business scenarios, understanding not just our platform but also core functionality

Key Achievements

- Migrated test cases from PractiTest to TestRails, auditing platform functionality and readability of tests to ensure proper coverage and quality
- Self-taught in Espresso framework to contribute to automated coverage of UI tests
- Able to quickly learn and understand business needs and requirements for the entire product, not just the functionality for one platform

Operational Support Specialist | 2018 – 2019 | Madison, WI

Key Responsibilities

- Calendar management for three directors and multiple managers within the department
- Management of contractor hours and contracts, worked with recruiters and directly with talent
- Coordination with our HR department to help schedule interviews, hire and onboard new employees
- Meeting support including capturing notes for technical documentation

Key Achievements

- Restructured our on-boarding process and rewrote our departmental on-boarding manual
- Developed a new form and process flow for our contract approvals from the manager level up to our c-level executives
- Helped support key director stakeholders as well as the build team environment with the launch of the new platform

Awards & Certifications
